

Mounted Shooters of America

Spreadsheet Instructions 2016

MSA Official Score Sheet Instructions.

To set up the MSA Official Score Sheet for your shoot, you need to first copy the score sheet to the hard drive on your computer giving the copied score sheet a unique name. Each time you start the score sheet you will need to enable macros. You may need to click on **Options**, then choose **Enable Content** and click OK, or just choose **Enable Content**. Then choose yes when asked to make this file a Trusted Document. In some Excel versions you may just need to save it as an Excel Macro enabled Workbook.

It is recommended that you create a folder with the name of the shoot on your hard drive. All of the documents that are related to that shoot can be put into this one folder. Open the score sheet on the MSA CD and then click on **File** and then **Save As**. At the bottom of the pop up box enter a unique name for this sheet in the box "file name". Make separate copies of the score sheet for each competition, rifle shoot or independent jackpot held giving each a unique name.

You can play with the score sheet all that you want; however, start with a fresh copy of the score sheet from the MSA CD when you are ready to hold a shoot. Do not open multiple copies of the score sheet at the same time.

There are a total of 6 pages in this score sheet beginning with Go Order and ending with Manual Sheet (see the red arrows at the bottom of the sheet). Use the black spreadsheet arrows at the bottom left to view all 6 pages (see red circle below). In the grey area, marked by the black oval, enter the name of your club, the name of your match and the date. By the red arrows there is also a drop down list under type of match. The only choices you will use are Local, Double, State, or Regional. The point multiplier shown by the 2nd red arrow will automatically change according to the type of match being held.

Enter the riders, their division and horse name on this page. If you need to change or remove a rider's information use the delete key to remove the information and then re-enter it if necessary. Do not use the space bar to blank out data, use the delete key.

Inside the purple box you will see the word flag. This column can be used for tracking a specific entry that only some people have opted to do. (Ex. Sharpshooter)

IF A RIDER CANCELS AT THE MATCH THEY MAY BE DELETED BY PRESSING THE REMOVE RIDER BUTTON. BE SURE TO HAVE YOUR CURSOR IN THE RIDER SPACE TO DO THIS. ONCE THIS IS DONE PRESS THE RESORT FINAL GO ORDER BUTTON AND IT WILL AUTOMATICALLY RENUMBER YOUR PAGE

After you have finished entering the rider information you need to decide what order you want the riders to run in. Click on the Go Order tab at the bottom of the spreadsheet.

A WORD OF WARNING: NEVER, EVER, EVER USE EXCEL'S CUT COPY OR PASTE FUNCTIONS WHILE USING THE SCORE SHEET. DOING SO IS GUARANTEED TO CORRUPT THE SCORE SHEET.

The Go Order page allows you to organize the go order by division and level. Simply use the drop down arrow to place the correct number by each division/level. Remember not to use duplicate numbers or the computer cannot separate and sort the way you wanted. Once all numbers have been filled in click the grey sort rider's button to sort the riders placed on the rider's sheet.

Manual Sheet

The Riders page has a **Final Go Order column** (red arrow) that you can use after you set the go order on the Go Order page. The reason for this special column on the Riders page is as follows. Let's say that you have two riders that are both in Men's Pro and that they are sharing guns and holsters. They will be riding in the same group (Men's Pro) and will not have enough time to change equipment.

You can "re-number" the Final Go Order column on the Riders page to move the riders for spacing for equipment changes. You can also use this feature if a person is riding more than one horse to keep your match running more smoothly. Simply use a decimal, 1.5 or 2.2 for example for each rider that needs to be shifted. When numbering is complete click on the **Resort Final Go Order button**. (red circle) This re-numbering just simply moves the riders around in order regardless of their Division.

You can re-number and press the resort button on this page at will. Yep, even during the shoot.

Once the final go order is established, it is recommended that you print a manual sheet. The manual sheet can be used for reference, for the announcer, or for the person running the gate. It should also be used for a handwritten copy of the times that can be used for double checking times. See the Manual Sheet tab at the bottom of the score sheet.

When you are done making changes and are ready to start the match, go to the **Manual Sheet** page and print out a copy for each stage. This page automatically fills in from the riders' sheet.

Calculating Paybacks:

If you go to the “By Division” sheet, you will notice to the far right there is a place to calculate paybacks. This calculation uses figures you supply such as entry fee, percent to payback and any added money.

First, click on the “Prepare sheet for pre-shoot payout printout”. Here fill in the entry fee for each division

Next, scroll farther down the sheet until you see the calculation box where you can enter the percent to pay back and any added money. The percent to pay back is taken from the gross entry fees so you pay back a true percent amount, not an amount after expenses. The added money will be added based on the number of competitors in a division/level (see explanation below).

Total entry fees	\$ 2,200.00
Percent of entry fees paid out	50%
Net total entry fee payout	\$ 1,100.00
Added money across ALL Divisions	\$ -
Added money to SPECIFIC Divisions	\$ -
Added money to SPECIFIC Places	\$ -
	\$ 1,100.00
Checksum	\$ 1,100.00
Places to pay	6

Enter payout data to light green cells

EXPLANATION OF PAYOUT CALCULATIONS:

A Division's entry fee x % payback gets paid to that particular Division
 Money can be added to the Match, which gets allocated across all Divisions as a percent of that Divisions participation. 2 places in a Division out of 30 places total receives 2/30 of the add, then split by table above.
 Money can be added to particular Division, such as a "Division Sponsorship"
 Money can be added to a specific place (i.e. LP first place).

Once you have done that press the “Press to Update” button located back at the top of the spreadsheet. The payouts will be automatically calculated based on the chart below.

If you want to add a specific amount of money to a specific division/level, you can add it in the “Manual add to Division” column where the payout amounts calculate. In this case the amount would be added only to that division/level. If you want to add a specific amount of money to a particular place, use the “Manual add to Place” column. Use this only if a certain amount of money has been allocated to a particular division/level/place by a sponsor or another source.

Go Order Riders By Overall By Division By Stage Manual Sheet

EXPLANATION OF PAYOUT CALCULATIONS

A Division's entry fee x % payback gets paid to that particular Division. Money can be added to the Match, which gets allocated across all Divisions as a percent of that Division's participation. 2 places in 30 places total receives 2/30 of the add, then split by 5. Money can be added to particular Division, such as a "Division Add".

A final few notes.

Press buttons as often as you would like for current standings whenever you want (even in the middle of a stage). The only exception to this is the Sort... button on the Go Order page as this will regroup the riders by class and over-ride your Final Go Order changes on the Rider page.

NEVER USE CUT, COPY, OR PASTE. Use the delete key to remove rider data.

Set the print area on each page that you are going to print before you print it.

Save the score sheet periodically throughout the competition in case of electrical failure.
